Dear Editor and Reviewers,

Please find attached the revised version of our previous submission entitled “**Title**” with manuscript number **JMLR-26-0001**. First and foremost, we greatly appreciate the valuable comments and constructive suggestions provided by all the reviewers, which have helped us significantly improve the quality of our paper. We are also grateful to the editor for encouraging us to resubmit a revised version. In this revision, we have carefully addressed all the reviewers’ comments. To make our responses as clear as possible, we provide below a summary of the main modifications and a detailed point-by-point response to the comments from Reviewers 2, 3, 4, 5, and 7, following the order in the decision letter.

Sincerely,

Author

Response to the Editor

Summary Comment 1

The reviewers have suggested some major revisions to your manuscript. Therefore, I invite you to respond to the reviewers' comments and revise your manuscript.

Response SC 1: We appreciate your handling of the review process.

Based on the reviewers' comments, we have checked our manuscript and addressed them as follows:

1. We have added new content.
2. We have removed the incorrect statements in Section I.

Response to Reviewer 2

Comment 2.1

Your work is really good. However, you should change the title.

Response 2.1: Thank you for the comment.

We agree that the title was somewhat misleading. We have therefore changed it in the current version of the manuscript.

Comment 2.2

Everything else is really good.

Response 2.2: Thank you for the comment.

We appreciate your positive feedback. We have also added the following to the revised manuscript:

This important sentence was added to the paper.

Response to Reviewer 3

Comment 3.1

The work is not very strong.

Response 3.1: Thank you for the comment.

We appreciate your honest assessment. We have carefully revised the manuscript to address the main concerns and have strengthened the presentation of our results.

Comment 3.2

You forgot to cite a very important reference!

Response 3.2: Thank you for the comment.

We recognize the importance of proper attribution and we appreciate you bringing this reference to our attention. Therefore, we have added references [1] and [2].

Response to Reviewer 4

Comment 4.1

Did you know that the references can be separated for individual reviewers?

Response 4.1: Thank you for the comment.

Yes. When using [bibtex](#), you can use the `refsection=section` option to achieve that. If we cite a new reference such as [1] here, it will again be numbered [1].

Note that you may need to run `pdflatex` and `biber` multiple times.

Reference [2] for Reviewer 4 is now numbered [2].
